DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Amon et. al., U.S.P. No. 5,197,691.

Amon et. al. 691' teaches (Figs.1-7c) an apparatus and method for directing light beams onto a target comprising: a laser light source 90, a beam splitter 86 for splitting the main beam into first and second split beam paths which utilize optical systems (ZPO) and (MTZ) which also include (first and second) plural lens and (first and second) aperture means which acts to expand the split beam paths and intersect the split beam paths at a target 80 using plural mirrors 88,76. The system of Amon et. al. uses telescopes/borosscopes to focus light beams to a target and uses beam scanning and computer control to help the light beams focus on the target. The teachings of Amon et. al. 691' clearly, fully meets Applicant's claimed limitations.

The following references are also cited by the Examiner as being pertinent prior art: Burland et. al., U.S.P. No. 5,719,690 (Fig.1), Moreau et. al., U.S.P. No. 4,161,652 (Figs.1-8d), Kepp, U.S.P. No. 3,567,163 (Figs.1-17), and Layton, U.S.P. No. 4,299,360 (Figs.1-8).
